Projects

BARE USA *Nation Wide* *2013 - Present*
A book that studies natural beauty in contrast with man-made decay by photographing nude models in abandoned locations across the United States. I am solely responsible of all aspects of this project: coordinating with models, researching location, executing shoots, editing images, and producing final images.

American Girl *Boca Raton, Fl* *2013*
Director of Photography for a short film. Much of the footage was featured at the Las Vegas Film Festival

Contest / Awards

Capture the Unknown *Nation Wide* *2012 - 2013*
One of four grand prize winners in a nation-wide photography contest put on by Marlboro. The challenge was to "Capture the Unknown" through a submission of up to twenty images. I chose to dive into the unknown myself by traveling to the western states of Arizona, Utah and Nevada and capturing as many interesting and thought provoking images as I could during a four day trip.

Grand Prix de la Decouverte *International* *2013*
Recipient of the of the Juror Award of Merit in the street photography / documentary category of the Grand Prix de la Decouverte International Photography Contest for my image titled "Venice Beach Study". The image caught the silhouette of a street performer being flipped in the air by his performing partner alongside the boardwalk of Venice Beach California.
