

Thomas Bollinger Arts

Thomas Bollinger (°1964, Washington DC) creates mixed media artworks, photos, & film.. With the use of original & appropriated materials which are borrowed from modern and ancient cultures and mixed with historical references literature, visual works and design elements. This genre of iconography creates a visual form of storytelling that plays with the past, present and future in a whimsically interpretive manner. Bollinger's photographic works are unique from a visual spatial relationship perspective and create an illusion of depth on a two dimensional plane thru the use of lighting, perspective and movement.
